

Modix

Large 3D Printers

Modix 3D printers are more powerful and more versatile !

Our large 3D printers allow you to print large objects in one part, resulting in a more durable object and less post processing is required. Customers also enjoy printing multiple smaller objects in one print job, as well as highly precision detailed prints (thinner than 50-micron layers)! Our customers are free to choose their own preferable filament vendor. Thanks to its modular design and self-assembly kit approach, customers ultimately have greater customization options and able to select between 3 optional print heads, several available add-ons such as an active air filter device and more. For more information, please visit our website at <https://modix3d.com>

BIG-60

600x600x660 mm
From 3,700 USD
